

Product News

Enbrel

Amgen Inc announces that the US Food and Drug Administration has approved the supplemental Biologics License Application for the expanded use of Enbrel (etanercept) for the treatment of moderate to severe plaque psoriasis in pediatric patients (aged 4–17 years). Enbrel, a tumor necrosis factor blocker, was approved for the treatment of moderate to severe plaque psoriasis in adults in 2004. For more information, visit www.enbrel.com.

Eucrisa

Pfizer Inc announces US Food and Drug Administration approval of Eucrisa (crisaborole) ointment 2% for the treatment of mild to moderate atopic dermatitis in patients 2 years and older. Eucrisa is a nonsteroidal topical phosphodiesterase 4 inhibitor and is applied twice daily. This approval provides patients with atopic dermatitis another treatment alternative, as this community has not had a new prescription treatment for more than 10 years. For more information, visit www.pfizer.com.

Isdinceutics

Isdin based in Spain has launched the Isdinceutics line of physician-dispensed cosmeceuticals to the US market, which focuses on vitamins and hydrators rather than chemicals to rejuvenate the skin. Isdinceutics features a daily antioxidant routine with Flavo-C Ultraglican and Flavo-C Serum to reduce the appearance of microwrinkles and elevate the skin's natural moisture production. Products to correct pigmentation problems as well as undereye circles and puffiness also are available. For more information, visit www.isdin.com/us.
