DerMend

Clark Pharmaceuticals LLC and Ferndale Healthcare, Inc, introduce DerMend Moisturizing Bruise Formula to help improve the skin's appearance from dark bruises on the arms, hands, chest, and legs caused by medications, aging, or everyday bumps. Formulated with ceramides, retinol, arnica oil, and glycolic acid, DerMend helps to rejuvenate and maintain skin firmness and elasticity, reduces discoloration, improves texture, and restores moisture to the skin when applied twice daily. DerMend is available online and in select drugstores. For more information, visit www.dermend.com.

Infini

Lutronic obtains US Food and Drug Administration 510(k) clearance for Infini, a 3-dimensional volumizing wrinkle reduction system that uses radio-frequency energy. It can be used in patients with melasma or other types of pigmented lesions. Infini's ComfortFlow technology enables smoother penetration via sequential needle insertion to maximize patient comfort, allowing for quick recovery. Adjustable depth control (up to 3.5 mm) enables treatment on delicate areas. For more information, visit www.usa.lutronic.com/infini.

Mirvaso

Galderma Laboratories, LP, receives US Food and Drug Administration approval for Mirvaso (brimonidine topical gel 0.33%), an α_2 -adrenergic agonist to treat

persistent (nontransient) facial erythema of rosacea in adults 18 years or older. This approval represents a milestone in rosacea treatment, offering patients a prescription therapy for redness. Applied once daily, the gel works quickly to reduce redness and can last up to 12 hours. For more information, visit www.mirvaso.com/hcp.

Taclonex

LEO Pharma Inc launches a 120-g package size of Taclonex (calcipotriene 0.005%–betamethasone dipropionate 0.064%) Topical Suspension for the treatment of body and scalp plaque psoriasis, which impacts patient satisfaction by offering the convenience of a larger package. Taclonex is applied to affected areas once daily for up to 8 weeks. For more information, visit www.taclonex.com.

Vibrance Rejuvenation System

Suneva Medical, Inc, introduces the Vibrance Rejuvenation System, a 12-week program that uses 3 different products to improve the skin's appearance and reduce the signs of aging. The system combines ArteFill, a dermal filler that promotes natural collagen growth; ReGenica, a physician-dispensed skin rejuvenation product line; and ReFissa (tretinoin emollient cream 0.05%), an antiaging treatment of fine facial wrinkles, mottled pigmentation, and tactile roughness. The system is unique because it seamlessly integrates simple skin care into the treatment plan for injectables. For more information, visit www.sunevamedical.com.
