

Declarations Checklist

Federal Practitioner requests authors include statements below in order to abide by the Editorial Policies. These statements will be included at the end of your published article. Even if you have previously supplied a statement, please provide the statement again below.

<u>Declaration:</u>	<u>Summary of statement:</u>	<u>Please provide your statements below:</u>
Acknowledgments	Please acknowledge anyone who contributed toward the article who does not meet the criteria for authorship. If you do not have any, you may state “not applicable” in this section.	
Author affiliations	This section outlines the current positions and affiliations of each author.	
Author disclosures	All authors must complete a conflict of interest form, which must be submitted before the article can be published. Any notable personal or financial conflict of interests must be declared here. If there are no notable conflicts to report, the authors may state “The authors report no actual or potential conflicts of interest with regard to this article.”	
Disclaimer	A standardized text is provided by <i>Federal Practitioner</i> (right). Authors do not need to provide an additional statement.	The opinions expressed herein are those of the authors and do not necessarily reflect those of <i>Federal Practitioner</i> , Frontline Medical Communications Inc., the US Government, or any of its agencies. This article may discuss unlabeled or investigational use of certain drugs. Please review the complete prescribing information for specific drugs or drug combinations—including indications, contraindications, warnings, and adverse effects—before administering pharmacologic therapy to patients.
Ethics	All authors are expected to adhere to the ethical principles for medical research involving human and animal subjects outlined in the World Medical Association’s Declaration of Helsinki as well as to all relevant guidelines from the institution in which the research was conducted. Authors must include a statement here revealing the pertinent	

	<p>details of ethics approval or exemption, including the full name of the Institutional Review Board (IRB) and the institution it belongs to.</p>	
Consent	<p>Studies involving the publication of potentially identifying information, such as case reports, require written consent for publication from the patient or a legal guardian. This must be stated in this section, if applicable. Please note the Editor may request a copy of the signed statement of informed consent to publish photographs, video, and other identifiable patient information.</p>	
Funding	<p>All sources of funding should be reported. If the funding body played a role in the design of the study, or the collection and analysis of data, this should be declared in this section.</p> <p>If no outside sources of funding, please use this text: The authors report no outside source of funding.</p>
