

Appendix Figure 1. A screenshot of the updated electronic health record order-set. (A) We clearly defined culture start time within the order-set. (B) We provided hyperlinks to the evidence-based guideline and microbiology lab processes (within the FAQ). (C) The default observation time for blood and CSF cultures was pre-selected to “Yes”. Providers could uncheck this box, and could specify alternate observation times under “additional discharge criteria”. (D) Blood and CSF culture start times were mandatory fields within the order-set.

▼ Discharge

▼ Discharge

(A) Culture "Start Time" is the time that the culture was received by the laboratory. Instructions on where to find this time are included in the FUS FAQ document on the HM resident team page (link below).

(B) - FUS Guidelines
