

Appendix Figure 6. Changes in SNF LOS Associated with BPCI Participation among Safety-Net Hospitals (2013-2016)

Notes: BPCI=Bundled Payments for Care Improvement. SNF LOS=Skilled Nursing Facility Length of Stay. SNH=Safety-Net Hospital. This figure shows results based on difference-in-differences analyses in which a negative change reflects a differentially lower LOS and a positive change reflects a differentially higher LOS. This figure shows that among safety-net hospitals, BPCI participation was not associated with differential changes in SNF LOS for medical condition episodes.
