

PRODUCTS

All Plant-Derived Skin Cream

Anti-Aging Beauty Serum with Liftonin helps reduce wrinkles and prevent the formation of new ones. It contains astringents from gallnuts as well as minerals and silicic acid from millet extract. For more information, contact Gerda Spillmann Swiss Skin Care by visiting www.gerdaspillmann.com or calling 800-282-3223.

Eczema Cream for Chronic AD

The Food and Drug Administration has approved a 510(k) premarketing notification for Eleteone cream, which will help manage

the signs and symptoms of chronic atopic dermatitis (AD) between flares, under the supervision of a physician. The cream uses Ferndale’s patented hydrolipid technology, which is a proprietary blend of lipids and water. For more information, contact Ferndale Laboratories Inc. at 800-621-6003.

Wine-Inspired Skin Care

Skin products from d’vine vinotherapy feature wine and grape extracts, including polyphenols, grape seed extracts, and resveratrol. The product line includes moisturizers, cleansers, toners, and skin-

firming gels that contain no chemical preservatives and include other natural ingredients such as shea butter and white willow bark extract. Contact d’vine vinotherapy by visiting www.dvineinc.com.

Soothing Skin Spray

Prime Care Easy Moist Zinc Spray contains 0.25% zinc pyrithione, a disinfectant that can relieve a range of skin conditions including rash, psoriasis, and skin allergies including contact dermatitis and diaper rash. The spray is hypoallergenic and fragrance free and absorbs quickly into the skin. For more information, contact Forte USA by visiting www.forte-usa.com.

Dermal Abrasion, Infusion System

The Vibraderm skin rejuvenation system is available for abrasive exfoliation of the skin. A handheld, stainless steel paddle vibrates at 88 Hz and removes 75%-85% of the stratum corneum, which prepares the skin for additional procedures. Another device function, Vibrafusion therapy, is used to massage topical products into the skin. For more information, contact Vibraderm by visiting www.vibraderm.com.

Tissue Expander for Wound Healing

The DermaClose RC Continuous External Tissue Expander facilitates closure of large wounds by expanding the skin surrounding the wound until it can be sutured. The device has 10 skin anchors and a tension controller to prevent over-tightening. In most cases, the wound can be sutured within 24 hours, which lowers both the costs and risks associated with wound healing. For more information or to order the product, visit www.woundcaretech.com.
