

JOURNAL OF HOSPITAL MEDICINE
Author's Agreement and Copyright Assignment

1. **TITLE AND AUTHORS.** The Authors hereby affirm that the manuscript entitled [PROVIDE FULL TITLE] What is the REAL cardiopulmonary arrest rhythm at the time of a code blue event? is original and does not in whole or part infringe any copyright, violate any right of privacy or other personal or property right whatsoever, or falsely designate the source of authorship; that it has not been published in whole or in part and is not being submitted or considered for publication in whole or in part elsewhere except in the form of an abstract of not more than 400 words; and that the authors have full power and authority to enter into this copyright assignment. Each author acknowledges that s/he participated in the work in a substantive way and is prepared to take public responsibility for the work. To qualify for authorship, each author should contribute substantially to the intellectual content of the work. Such contribution consists of: a) participating in the conception and design or analysis and interpretation of data; b) drafting the article or critically revising it; and c) approving the final version submitted, and approving any subsequent revisions. All three conditions must be met to justify authorship.
2. **FULL DISCLOSURE.** Authors have disclosed financial interests that might be construed as affecting the conduct or reporting of the work submitted on a conflict of interest form. Any limitation to the full access of the Authors to all material has also been disclosed on that form.
3. **ASSIGNMENT OF COPYRIGHT.** The authors, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, do hereby irrevocably assign and transfer all the authors' rights, title and interest in and to the copyright of the manuscript, in its current form or in any form subsequently revised for publication or in any medium now known or hereafter discovered, including without limitation print, microfilm, and electronic media, any and all renewals and extensions of such copyright that may be secured under the laws now or hereafter pertaining thereto in the United States and any and all causes of action heretofore accrued for infringement of said copyright, to the Society of Hospital Medicine, its successors and assigns ("SHM"). The authors reserve the following: a) trademark rights and patent rights, if any; and b) the right to revise, adapt, prepare derivative works, present orally or distribute the work, provided that all such use is solely for the personal non-commercial benefit of the Author, or if the article is a "work-for-hire" and made within the scope of the Author's employment, the employer may use all or part of the information contained in this article for intra-company use, provided the usual acknowledgments are given regarding copyright notice and reference to the original publication.
4. **GOVERNMENT EMPLOYEES.** Manuscripts prepared by individuals as part of their official duties as United States government employees are not subject to the copyright assignment herein. Government employees must sign the authors' agreement form, but should designate if the work qualifies as a work of the U.S. government. Does this manuscript qualify as a work of the U.S. government? Yes No
5. **NAMES OF AUTHORS.** Authors names; should appear in the same order on this form as on the submitted manuscript. Please copy this form if more space for names is necessary.
6. All authors are aware that it is the responsibility of the corresponding author to transmit the decision to his/her co-authors.
7. If this manuscript is not accepted for publication, the copyright assignment has no legal effect and will be returned upon request.

Journal of Hospital Medicine Author Contribution Form

The *Journal of Hospital Medicine* adheres to the authorship guidelines set by the International Committee of Medical Journal Editors – “Authorship should be based on: (1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; (2) drafting the article or revising it critically for important intellectual content; and (3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3” (from www.icmje.org). Authorship is not justified for individuals who simply obtain or provide funding, participate in data collection or general supervision of the research, or serve as head of the group, though such contributors may be acknowledged with their written permission in the Acknowledgements section.

Completion of the author contribution form is not required upon initial manuscript submission. If a revision is requested after initial peer review, the corresponding author should complete this authorship form on behalf of all authors and upload it as Supplementary Material Not for Review. It will appear online as Supporting Information if the article is published. Failure to upload this form will block further manuscript processing.

ICMJE Form for Disclosure of Potential Conflicts of Interest

Instructions

The purpose of this form is to provide readers of your manuscript with information about your other interests that could influence how they receive and understand your work. The form is designed to be completed electronically and stored electronically. It contains programming that allows appropriate data display. Each author should submit a separate form and is responsible for the accuracy and completeness of the submitted information. The form is in four parts.

1. Identifying information.

Enter your full name. If you are NOT the corresponding author please check the box "no" and a space to enter the name of the corresponding author in the space that appears. Provide the requested manuscript information. Double-check the manuscript number and enter it.

2. The work under consideration for publication.

This section asks for information about the work that you have submitted for publication. The time frame for this reporting is that of the work itself, from the initial conception and planning to the present. The requested information is about resources that you received, either directly or indirectly (via your institution), to enable you to complete the work. Checking "No" means that you did the work without receiving any financial support from any third party -- that is, the work was supported by funds from the same institution that pays your salary and that institution did not receive third-party funds with which to pay you. If you or your institution received funds from a third party to support the work, such as a government granting agency, charitable foundation or commercial sponsor, check "Yes". The complete the appropriate boxes to indicate the type of support and whether the payment went to you, or to your institution, or both.

3. Relevant financial activities outside the submitted work.

This section asks about your financial relationships with entities in the bio-medical arena that could be perceived to influence, or that give the appearance of potentially influencing, what you wrote in the submitted work. You should disclose interactions with ANY entity that could be considered broadly relevant to the work. For example, if your article is about testing an epidermal growth factor receptor (EGFR) antagonist in lung cancer, you should report all associations with entities pursuing diagnostic or therapeutic strategies in cancer in general, not just in the area of EGFR or lung cancer.

Report all sources of revenue paid (or promised to be paid) directly to you or your institution on your behalf over the 36 months prior to submission of the work. This should include all monies from sources with relevance to the submitted work, not just monies from the entity that sponsored the research. Please note that your interactions with the work's sponsor that are outside the submitted work should also be listed here. If there is any question, it is usually better to disclose a relationship than not to do so.

For grants you have received for work outside the submitted work, you should disclose support ONLY from entities that could be perceived to be affected financially by the published work, such as drug companies, or foundations supported by entities that could be perceived to have a financial stake in the outcome. Public funding sources, such as government agencies, charitable foundations or academic institutions, need not be disclosed. For example, if a government agency sponsored a study in which you have been involved and drugs were provided by a pharmaceutical company, you need only list the pharmaceutical company.

4. Other relationships.

Use this section to report other relationships or activities that readers could perceive to have influenced, or that give the appearance of potentially influencing, what you wrote in the submitted work.
